PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 10+ years building production web applications end-to-end across the MERN/PERN stack, Next.js, and Node.js. Experienced designing responsive frontends, secure scalable backends, and integrating AI features into live products, most recently as a CTO owning full-stack delivery for Web2, Web3, and AI platforms.

CORE SKILLS

Frontend: JavaScript, TypeScript, ReactJS, NextJS, HTML, CSS, Bootstrap, Tailwind

Backend: NodeJS, NestJS, Express, PHP, Python, GraphQL, WebSockets, Microservices

Databases: MySQL, PostgreSQL, MongoDB, Redis, Firebase

Cloud & DevOps: AWS, Google Cloud, Oracle Cloud, Docker, Kubernetes, Terraform, Nginx, GitHub Actions, Jenkins, GitLab CI, Grafana, Linux, Github

Blockchain & Web3: Solidity, EVM (Expert), Web3, Blockchain, Chainlink Oracles, Cross-Chain Bridging, Solana / Rust / Anchor (Foundational), Hardhat, Truffle, Remix, Ganache, MERN

AI / LLM: OpenAI API, Anthropic API, LangChain, Pinecone, Weaviate, Fine-Tuning, Prompt Engineering, AI Agents, Python

Leadership & Methodologies: Team Leadership & Mentoring, Hiring & Performance Reviews, Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer — Erly Stage Studios (Remote)

03/2025 – Present | London, United Kingdom

- Architect and build full-stack web applications using React, Next.js, and Node.js for a UK-based product team, shipping responsive, production-ready interfaces alongside secure backend services.
- Design and harden REST/GraphQL APIs and WebSocket-based real-time features — authentication, validation, and query optimization — reducing average API response times by an estimated 25%, backed by Jest test coverage.
- Integrate LLM-powered features (OpenAI/Anthropic APIs, LangChain, prompt engineering) into production applications, automating manual workflows and cutting task completion time by an estimated 30%.
- Own end-to-end technical architecture for new product features, evaluating scalability, maintainability, and delivery trade-offs before implementation.

CTO, Full-Stack Developer & Blockchain Engineer — Chaos Corporation

12/2021 – 01/2025 | Karachi, Pakistan

- Led full-stack delivery of multiple Web2 and Web3 products as CTO, owning everything from user-facing interfaces to backend services and database design.
- Designed scalable, microservice-based Node.js/Express backend services and relational/NoSQL data layers (REST/GraphQL) supporting SaaS and blockchain platforms processing real-time transactions, with Jest/Mocha test coverage safeguarding releases.
- Set technical architecture and engineering standards as CTO — owning SDLC, code quality, and DevOps practices across a portfolio of Web2, Web3, and AI products.
- Scoped and delivered multi-vendor SaaS and blockchain solutions end-to-end, from client requirements through architecture, third-party integration (Stripe Connect), and production deployment.

Software Developer — TeraHz Solutions

04/2021 – 12/2021 | Karachi, Pakistan

- Built responsive product frontends using vanilla HTML, CSS, and JavaScript, improving UI consistency across the product line.
- Developed a custom WordPress plugin adding new functionality and improving user experience, adopted across multiple client sites.

PHP / MERN Stack Developer — Freelance

02/2019 – 04/2021 | Karachi, Pakistan

- Delivered dynamic, responsive web applications for multiple clients using PHP and the MERN stack, from requirements gathering through deployment.
- Built scalable backend services and REST APIs in PHP and Node.js, designing database schemas to support growing client applications.

IT Officer — ShopnGo.PK

03/2018 – 10/2019 | Karachi, Pakistan

- Monitored and maintained servers and networks, resolving technical issues and reducing recurring downtime through proactive troubleshooting.

IT Assistant & Developer — Refaia Trust Pakistan

09/2011 – 03/2020 | Karachi, Pakistan

- Built and maintained the organization's website using PHP, keeping content and functionality up to date.

KEY PROJECTS

SaaS Website & Project Management Platform

- Developed a multi-vendor SaaS with an integrated website and funnel builder.
- Integrated Stripe Connect for subscriptions and payments.
- Built a custom dashboard with project management, analytics, and role-based access.

AI Scheduling Assistant Platform

- Developed an AI-powered scheduling system that automates meeting bookings, cutting manual coordination time by an estimated 40%.
- Designed calendar management features to streamline users' time management.
- Built subscription and waitlist management for user access control.

Tokenized Carbon Credit Platform (PERN Stack)

- Implemented a trade order book and tokenized carbon-credit system for secure, transparent transactions.
- Built an ERC-20 token with trackable NFTs to offset carbon footprints.
- Implemented multi-signature admin verification to secure fund flows.

Payout Pursuit & Studio Token

- Built an EVM-based multi-chain game with a cross-chain, tradeable game-studio token.
- Implemented advanced cross-chain bridging logic so the token could move across multiple chains.

EDUCATION

BS – Computer Engineering

Sir Syed University of Engineering & Technology | 01/2017 – 03/2021 | Karachi, Pakistan

Diploma of Associate Engineering – Electronics

Aligarh Institute of Technology | 2013 – 2016 | Karachi, Pakistan

CERTIFICATIONS

- Web & Mobile Hybrid Application Development
- Full-Stack Web Development with React
- Linux Essentials Professional Development Certificate
- MTA: Windows Server Administrator Fundamentals – Certified
